

CHEMICAL FILLING & PACKAGING EXCEEDING EXPECTATIONS

Established in 1987 to offer contract chemical packaging and bottle filling services. Conveniently located within the Dallas Fort Worth metroplex, Dalden Corporation is logistically well positioned to serve all parts of the country.

YOUR SUCCESS IS DEPENDENT ON HAVING THE RIGHT PARTNERSHIPS. DALDEN HAS A 30 YEAR HISTORY OF SUCCESSFUL LONG-TERM PARTNERSHIPS.

OUR MISSION

We are focused on individual attention to the specific needs of our customers and delivering satisfaction. Dalden Corporation is your partner for chemical blending services for commercial, industrial, and government applications. We specialize in solvents, caustics and flammables. Our clients experience reliable and efficient solutions, combined with excellent customer service.

FACILITIES AND INFRASTRUCTURE

Our EPA registered facility comprises over 100,000 square feet of manufacturing space and a 200,000-gallon tank farm with bulk blending capabilities. An on-site testing lab and strict quality control procedures ensure consistent quality of every blend. Located in the Dallas Fort Worth metroplex, Dalden Corporation's facilities provide easy access to major U.S. roadways, ports and airports. In addition to domestic US customers, Dalden ships to a world-wide customer base. Dalden has a full-time work force of employees, and a readily accessible local labor pool to accommodate surges in demand due to seasonality or rush projects. We use a range of filling machinery and fill millions of units each year.

CUSTOM IS OUR SPECIALTY

Custom label design, screen printing, warehousing, and quality control testing with certificate of analysis and SDS creation services are available. We can fill glass and plastic bottles, as well as tins and jars. Our high-speed liquid filling lines can produce up to 100 bottles per minute. Included in our operations are heat induction, capping and sealing. Dalden excels at products like nail polish remover, solvents, degreasers and cleaning products.

CONTRACT LIQUID FILLING

BULK BLENDING

KITTING AND ASSEMBLY

FLAMMABLES AND CAUSTICS FILLING

WAREHOUSING AND LOGISTICS

PROJECT TYPES

Capabilities include custom, contract blending from 100 to 50,000 gallons of chemicals, formulation of new, existing, and modified products, and nitrogen blanketing for moisture-sensitive products. Blended chemicals include water-based cleaners, solvent-based lacquer thinners, glass cleaners, and military-specific decontaminants. We also offer custom, private label packaging from 4 oz. to bulk totes.
